## RESCUE KITTENS AVAILABLE

Litter found 24 September 2010

A good friend found these 4 foundling kittens in his backyard, abandoned by their mother, who was frightened away when my friend's dogs pulled down a section of fence partitioning that was protecting the kittens. Only days old and with no way of knowing how long the kittens had been without their mother, my husband and I bundled the little ones up and gave them to my Ragdoll Queen, Zoe, to nurse. A gentle mother with a big heart and nurturing temperament, Zoe has adopted these babies as her own.

Our rescue kittens are \$150 each and, as with all kittens that leave our home, they will be ready from 12 weeks of age, and will come:

- Sterilised
- Microchipped
- Vaccinated
- Wormed
- Flea treated
- Toilet trained
- Health checked

### Interesting and Fun Facts About Cats

Our feline friends are unique and wonderful companions. Below is a collection of interesting and fun facts about cats.

- Cats are members of the Felidea family.
- A litter of kittens is called a kindle, and a group of cats is called a clowder.
- Cats are the only animals that purr. They can purr at around 26 cycles per second, which is the same frequency as an idling diesel engine.
- A cat's nose pad is as unique as a human fingerprint. No two nose prints are identical.
- A cat's hearing is much stronger and more sensitive than a dog's or a human's. Our hearing stops at 20 khz; a cat's at 65 khz.
- A cat's sense of smell is about 14 times stronger than ours.
- Cats have five toes on their front paws and four on their back paws. If a cat is polydactyl, s/he has extra toes.
- Cats have over 100 vocals sounds, while dogs have only 10.
- Normal body temperature for a cat is between 100.5 F and 102.5 F.
- Cats drink liquid from the underside of their tongue, not from the top.
- Cats use their whiskers to determine if the space they are entering is big enough for them.
- Only about 80% of cats have the gene that allows them to respond to the effects of catnip. The other 20% are not affected by it.
- Domestic cats are the only cats that can hold their tails vertically while they walk. Wild cats hold theirs horizontally or between their legs.
- A cat lover is called an ailurophile.

## RESCUE KITTENS AVAILABLE

Litter found 24 September 2010

A good friend found these 4 foundling kittens in his backyard, abandoned by their mother, who was frightened away when my friend's dogs pulled down a section of fence partitioning that was protecting the kittens. Only days old and with no way of knowing how long the kittens had been without their mother, my husband and I bundled the little ones up and gave them to my Ragdoll Queen, Zoe, to nurse. A gentle mother with a big heart and nurturing temperament, Zoe has adopted these babies as her own.

Our rescue kittens are \$150 each and, as with all kittens that leave our home, they will be ready from 12 weeks of age, and will come:

- Sterilised
- Microchipped
- Vaccinated
- Wormed
- Flea treated
- Toilet trained
- Health checked

### Interesting and Fun Facts About Cats

Our feline friends are unique and wonderful companions. Below is a collection of interesting and fun facts about cats.

- Cats are members of the Felidea family.
- A litter of kittens is called a kindle, and a group of cats is called a clowder.
- Cats are the only animals that purr. They can purr at around 26 cycles per second, which is the same frequency as an idling diesel engine.
- A cat's nose pad is as unique as a human fingerprint. No two nose prints are identical.
- A cat's hearing is much stronger and more sensitive than a dog's or a human's. Our hearing stops at 20 khz; a cat's at 65 khz.
- A cat's sense of smell is about 14 times stronger than ours.
- Cats have five toes on their front paws and four on their back paws. If a cat is polydactyl, s/he has extra toes.
- Cats have over 100 vocals sounds, while dogs have only 10.
- Normal body temperature for a cat is between 100.5 F and 102.5 F.
- Cats drink liquid from the underside of their tongue, not from the top.
- Cats use their whiskers to determine if the space they are entering is big enough for them.
- Only about 80% of cats have the gene that allows them to respond to the effects of catnip. The other 20% are not affected by it.
- Domestic cats are the only cats that can hold their tails vertically while they walk. Wild cats hold theirs horizontally or between their legs.
- A cat lover is called an ailurophile.
